26 APR 1973

Vice Admiral V. P. de Poix, USN  
Director  
Defense Intelligence Agency  
Washington, D. C. 20301

Dear Vince:

Thank you for your letter of 14 April 1973 responding to my December 1972 request to continue using classroom space in Building T-4, Defense Intelligence School, during Fiscal Year 1974. Because of its great importance to the entire intelligence community, I feel the Director will not be very happy. He may call you next week upon his return to Washington.

Since the proposal in your letter is not clear to me, relative to available classroom space and to the technical difficulty of installing terminals connected to classified data bases, I would like to clarify these matters this week. Were I not leaving the area today on TDY, I would see you personally. However, I have asked Mr. Harold L. Brownman, Deputy Director for Management and Services, to see you before the Director's return to seek a clear understanding of your intentions.

FY 74 is close at hand and we do not have much more time before reaching a decision about the physical location of the information science training program. As you know, the immediate future of interagency training in information science depends on an early solution to the classroom and terminal space problem. I certainly hope we can find a cooperative solution to this one.

Sincerely,

*/s/ Vernon A. Walters*

Vernon A. Walters  
Lieutenant General, USA  
Acting Director

MEMORANDUM FOR: General ~~Walters~~

We have tried to cast this response to Admiral de Poix as you requested. It is not particularly subtle in implying displeasure about the situation but should impress upon him the urgency of reaching a decision.

It would probably be wise to have this handcarried this afternoon. If you agree, I will arrange.

I recommend your signature on the attached letter.

(handcarried by Mr. Brownman, 4/26)<sup>3</sup>

Harold L. Brownman

## DEFENSE INTELLIGENCE AGENCY

WASHINGTON, D.C. 20301

U-71633/DS

Lieutenant General Vernon A. Walters, USA  
Deputy Director  
Central Intelligence Agency  
Washington, D. C. 20505

Dear General Walters:

I would like to acknowledge your recent letter indicating your interest in establishing an expanded joint intelligence community information science training program. In it you requested whether the Defense Intelligence Agency (DIA) would consider assigning three full-time employees to this program on a non-reimbursable basis. In addition, you inquired if DIA would provide additional space in Building T-4 of the Defense Intelligence School to permit approximately 50 weeks of instruction in FY 74.

While I definitely agree there is much value in such a program, this Agency is not in a position at this time to fully comply with your desire, insofar as space is concerned at the Defense Intelligence School. Recently DIA expanded the curriculum of the School to permit greater attendance for established courses, to pursue a new Indications and Warning Course, and to implement a Master's degree program. This expansion of activities has increased DIA's need for more space to adequately handle the additional activities.

2 With current facilities, any attempt to manage the Information Science Training Program in the School would create chaotic conditions, provide little value to the program you propose, and most likely jeopardize the School's impending Master's degree program.

I desire to continue maximum support for the Defense Intelligence School; therefore, I feel we should consider establishing the Information Science Center in some other location. I am prepared to offer the program three full-time employees, and appropriate expertise, on a loan basis. DIA intends to position the three training billets directly under the Career Development Division, Personnel Management Directorate. The Personnel Assignment Branch would monitor assignments to these positions and would work with the Services to obtain qualified replacements when necessary.

I propose, for your consideration, that a permanent Information Science Center be established at the Pomponio Plaza Building, Rosslyn, where DIA can provide approximately 1,600 square feet of TK validated space for this function. I realize this proposal would require relocation of

GE Terminals you presently have available in Building T-4; however, this should present no problem since the equipment needs merely to be plugged into a normal electrical circuitry. You may consider installing additional terminals and tie-in to the DIAOLS system from this new location as well; however, CIA would have to consider installation costs for these DIAOLS terminals in your funding actions. The Pomponio location, I believe, is easily accessible, has improved facilities, and possesses adequate security for all the training activities proposed for that location. !

If the above proposals should, for any reason, prove unacceptable, you may wish to establish a small committee of representatives from your organization, the National Security Agency (NSA), and DIA to develop additional proposals and recommendations.

I support your interest to formulate the Information Science Training Program and will do the utmost to assist you within the limitations of our available resources. My Deputy Director for Support, Colonel [ ] STAT [ ] can assist your Project Manager as required. He is located in Room 2E 238, the Pentagon and can be reached at 697-4680.

Sincerely,

V. P. de POIX  
Vice Admiral, USN  
Director

STAT

Notes from Meeting with [ ] USN Commandant  
Defense Intelligence School (DIS)

Even if we move from DIS (and we almost certainly will under the present limits on program time and staff) we will wish to schedule time on the classified terminals at DIS.

Even if we move (assuming we continue in a community mode) we will wish to pursue with DIA their offer to assign three full-time employees to the staff.

The "outside offer" made by DIA is to continue the present level of course scheduling (22/25 weeks per year) and the present level of staffing at DIS. General Walters' letter of 29 December 1972 proposed an expanded program (45/50 weeks per year) to meet growing community needs.

STAT

Possible "other space" at DIS (mentioned in conversations with [ ] is old WW II type enlisted barracks. In my view, this building is not worth rehabilitating.

STAT

CIA/OTR provides extensive support to the DIS, approximately 450 hours of presentations per year by 120 individuals. Also, OTR has a full-time liaison officer, Mr. [ ] on the DIS staff.

STAT

Conflicts of interest did characterize the relationship between the old Information Science Center (ISC) and [ ] particularly when the school was closed out last year. Two of our present faculty members are identified with the "old ISC image" in [ ] mind. Because of this, I was brought in by OTR to manage the project. My relationship with [ ] has been correct in every regard. Mr. [ ] enjoys an excellent relationship.

STAT

STAT

STAT

STAT

We have no complaints regarding DIS support during the past year. [ ] has provided all of the services agreed to for FY 1973. He states that he cannot support the FY 1974 proposals calling for an increase in program and staff.

STAT

[ ] has not favored the information science program and has made the following comments to me:

April 1972 - "There are no DIA requirements for this kind of training. Why don't we accept the DoD verdict to close the ISC and forget it."

ADMINISTRATIVE

INTERNAL USE ONLY

December 1972 - "I should never have allowed  
this program to get a foot in my door. Now  
you are going to try to push me out of my space."

**CENTRAL INTELLIGENCE AGENCY**

WASHINGTON, D. C. 20505

**OFFICE OF THE DIRECTOR**

23 MAY 1972

Lieutenant General J. M. Philpott, USAF  
Deputy Director, Defense Intelligence Agency  
The Pentagon  
Washington, D. C. 20301

Dear General Philpott:

Thank you for your letter of 13 April 1972 indicating the conditions under which the Defense Intelligence School will provide support to our proposed Information Science Program for FY 1973. The conditions under which the Defense Intelligence School will provide office space, secure classrooms, student study rooms, terminals, equipment and furnishings in Buildings T-42 and T-4 and the necessary security guards, chaf service, utilities and building maintenance are satisfactory.

The Central Intelligence Agency's Director of Training and the Commandant, Defense Intelligence School, have completed the coordination of plans for an interim CIA-managed Information Science Training Program in your Anacostia facilities during FY 1973. A mutually satisfactory arrangement has been achieved which will enable the Agency to program approximately twenty weeks of instruction in Building T-4 during FY 1973.

I appreciate your cooperation in this matter and the helpfulness of the Commandant, Defense Intelligence School, and his staff in the resolution of problems associated with these arrangements.

Sincerely,

[Redacted Signature]

W. B. Colby  
Executive Director-Comptroller

1972

13 APR 72

Mr. W. E. Colby  
Executive Director-Comptroller  
Central Intelligence Agency  
Washington, D. C. 20505

Dear Mr. Colby:

Thank you for your letter of 24 March 1972, indicating your Agency's interest in continuing training in Information Science. As stated in my memorandum of 3 February 1972 to the Chairman, United States Intelligence Board, the Defense Intelligence Agency can no longer fund or provide any personnel for this program but can furnish some instructional space in support of it.

Some of the Defense Intelligence School facilities used by the former Information Science Center can be made available in FY 73 for this purpose on a part-time, shared basis. There is a record high enrollment in the School's 34-week Post-Graduate Intelligence Course in FY 73, and it will be necessary for the Defense Intelligence School to present two of its courses in Building T-4. Additionally, the computer terminals and secure area in this building will be required by the School throughout the year to provide ADP on-line terminal and other instruction for various Defense Intelligence School courses, as well as to provide in-house DIAOLS/COINS training for DIA employees, as was the case this year. This is the only such facility DIA has for its own in-house training in DIAOLS/COINS and related computer applications. Accordingly, Building T-4 will be utilized full time by the School for at least seven months of the year.

The School can, however, provide the following support to the proposed Information Science program for FY 73:

a. Office space for up to six persons (in Building T-42).

b. Use of a secure classroom, student study rooms, terminals, and available equipment and furnishings in Building T-4 on request at various periods totalling approximately four to five months during the year. (The exact dates to be scheduled so as not to conflict with Defense Intelligence School courses.)

Coord  
Director's Cy  
Secretariat Cy #4406  
DS R/F  
DS-7 R/F  
DS-7 Cy  
DS-7 Serial

c. Security guards, chaf service, utilities and building maintenance.

Inasmuch as the Defense Intelligence School will be the prime occupant and user of the premises, the above support can be provided for FY 73 at no cost to CIA. However, all faculty and staff, as well as all costs for expendable supplies, textbooks, graphics, and administrative support associated with the Information Science courses will be CIA's responsibility.

Further coordination and finalization of the details may be worked out directly with the Commandant, Defense Intelligence School, as suggested in the last paragraph of your letter.

ILLEGIB

Sincerely,

SIGNED

JAMMIE M. PHILPOTT  
Lieutenant General, USAF  
Deputy Director
